Work authorization: F-1 STEM OPT, eligible to work in the US for up to 3 years with no visa sponsorship needed

SUMMARY

Data analyst who learned the value of data on a retail floor: two years at Decathlon turning sales dashboards into stocking and layout decisions, then an M.S. in Business Analytics (4.0 GPA) and two peer-reviewed papers. I build SQL, Python and optimization models that turn messy data into decision-ready answers.

EXPERIENCE

Omni Sport Leader, Department Manager · Decathlon Sports India, Mumbai — Mar 2022 – Jun 2024

- Reduced stockouts by **21.3%** with a data-driven inventory system: optimized reorder points, safety stock and monitoring.
- Drove a **15.88% revenue increase** through demand forecasting and category-level sales analysis in Excel.
- Built weekly and monthly MIS dashboards (orders, fulfilment, lead times, returns) used daily by store management.
- Daily manager of the city's largest store 1–2 days a week: staffing, operations, safety, cash and security.
- Cut costs by **10%** via resource allocation and vendor negotiations; supervised and trained **15+ team members**.

Director of Research and Publications · Quinnipiac Blockchain, Quinnipiac University — Aug 2025 – May 2026

- Published **2 peer-reviewed papers** on SSRN: a tokenized reward system for student engagement in higher education (sole author) and AI text analysis of court rulings (co-author).
- Presented at the **Yale Global Justice Conference** on blockchain-based incentive systems.
- Led a team of 6 board members across research projects and conference submissions.

SELECTED PROJECTS

Supply Chain Network Optimization — Excel Solver · Linear Programming

- Modeled 3 warehouses and 6 boutiques as a linear program with 18 routes; cut monthly distribution cost by **32.9%** (about ₹8 lakh a year) and used sensitivity scenarios to find the capacity limiting further savings.

Legal Motion Outcome Prediction (co-authored, SSRN) — Python · SAS Enterprise Miner · Decision Trees

- Built a dataset of **1,535** federal court opinions with a Python scraper, mined the text into 22 topic features and trained an interpretable decision tree that classified **70.3%** of unseen motions correctly.

IBM HR Attrition Analysis — SQL · MySQL

- Wrote 10 SQL queries on 1,470 employee records; found overtime workers leave at **30.5%** vs 10.4% for others and turned the findings into six retention recommendations.

Palate, Wine Recommendation SaaS — Python · FastAPI · React · scikit-learn

- Built a 5-question taste quiz that returns 3 in-stock wines, using cosine similarity from day one and a KNN model that takes over as purchase data grows.

EDUCATION

M.S. Business Analytics (STEM) · Quinnipiac University, Hamden, CT — Aug 2024 – May 2026

GPA 4.0/4.0. Worked on campus as barista manager at the campus Starbucks throughout the program.

Bachelor of Sports Management · IISM, Mumbai — Sept 2020 – Jul 2023

SKILLS

Languages & databases: Python (pandas, scikit-learn), R (tidyverse), SQL (MySQL, SQL Server), SAS

Analytics & BI: Tableau, Power BI, Google Analytics, Advanced Excel (Solver, macros, PivotTables)

Techniques: Predictive modeling, data mining, NLP/text mining, clustering & PCA, linear programming, Monte Carlo

Certifications: Advanced Excel, SQL, Sports Analytics
